EDUCATION

Ranked 4th in the zonal level of Karnataka and Kerala in the Unified Council Olympiad examination in 4th grade.

Base PU College, Rajajinagar— II PUC

April 2023 - March 2025

Scored- 93.5%

St. Mary's Public School, T. Dasarahalli— X grade

June 2013 - March 2023

Scored- 92.8%

PROJECTS

Bank Account Management System (Python) – Built a CLI-based system to manage multiple accounts using dictionaries and menu-driven options. Currently extending with file handling for persistence.

Snake Game & Brick Breaker (Python, Pygame) – Implemented classic arcade games focusing on event handling, collision detection, and game loop logic.

Typing Speed Tester (HTML, CSS, JS) – Web app to measure typing speed, similar to MonkeyType.

Interactive Web Apps (HTML, CSS, JS) – Created small projects including a Card Flip Game, Color Palette Generator, Countdown Timer, and Digital Drum Kit.

STONKS – Predictive Stock Ranking System *Data Science Course Project | Team of 3*

- Owned the core prediction engine – engineered momentum and trend features from 5 years of NSE stock data, trained a Linear Regression model to predict 5-day forward returns, and generated a ranked leaderboard of energy sector stocks by predicted performance
- Implemented sequential train/test split to prevent look-ahead bias, evaluated model performance using MAE and RMSE
- Coordinated module interfaces across the team, ensuring clean data handoffs between the pipeline and visualization layers

SKILLS

Programming Languages:

Python, C++ (basics),
JavaScript, HTML, CSS

Python Development:

CLI applications, menu-driven programs, dictionaries, Pygame (game development), basic DSA problem solving

Web Development:

DOM manipulation, interactive web apps, small-scale games (Card Flip, Typing Speed Tester, Countdown Timer, etc.)

Problem Solving:

Practicing Data Structures & Algorithms in Python (currently strengthening fundamentals and efficient approaches)

LANGUAGES

English, Kannada, Hindi.
